IN THE ABSTRACT:

Please replace the abstract with the abstract described below:

Disclosed are stabilized body care products, household products, textiles and fabrics comprising an effective stabilizing amount of at least one compound selected from the group consisting of formula (I) – (III)

where

G₁ and G₂ are independently alkyl of 1 to 4 carbon atoms or are together pentamethylene,

 Z_1 and Z_2 are each methyl, or Z_1 and Z_2 together form a linking moiety which may additionally be substituted by an ester, ether, hydroxy, oxo, cyanohydrin, amide, amino, carboxy or urethane group,

X is an inorganic or organic anion, and

where the total charge of cations h is equal to the total charge of anions j; and an organic UV filter selected from

- (c₁) dibenzoylmethane derivatives;
- (c₂) cinnamic acid esters;
- (c₃) camphor derivatives; and
- (c₄) trianilino-s-triazine derivatives.

The stabilized products are for example skin-care products, hair-care products, dentifrices, cosmetics, laundry detergents and fabric softeners, non-detergent based fabric care products, household cleaners and textile-care products.
